[90 min] DO: Assignment 6 / Build Triggers A↓

Due Feb 28 by 11:59pm   **Points** 100   **Submitting** a file upload
File Types db, sql, zip, jpg, jpeg, and rmd   **Available** until Mar 2 at 11:59pm

This assignment was locked Mar 2 at 11:59pm.

Format

Individual.

Instructions

Continue with the database designed in Assignment 3. Construct at least one trigger to either manage a constraint, a derived attribute, or create an audit trail. Update the database if necessary. Which (one) trigger you create and on which table is your choice, but in your submission explain why you built that trigger and what its intended purpose is.

Submission

Submit your database (as a saved binary database file with a *.db* extension) and your script (text file with a *.sql* extension) or an R Notebook (*.Rmd*) for your trigger. Explain the intended purpose in a submission comment or in your R Notebook. You may submit the files individually but we would prefer then zipped into a single file.

A6.Su20 Rubric				
Criteria	**Ratings**			**Pts**
Trigger definition is shown and explained.	**60 pts** **Full Marks**	**40 pts** **Definition shown but not explained**	**0 pts** **No Marks**	60 pts
Trigger functions as described and working of trigger is demonstrated.	**40 pts** **Fully works**	**20 pts** **Partially works**	**0 pts** **Does not work**	40 pts
			Total Points: 100
